Product Information

OPN-UF 2000® Weld Separating Agent

- NON-FLAMMABLE ·

www.opn-chemie.de

• silicone-free

- wax-free
- aqueous emulsion

Properties:

- prevents adhesion of weld spatters
- protects workpieces and tools from welding sparks
- very economical in use apply very thin
- paint friendly when used properly

Application Range:

- separating and protection agent for shielding gas and electrode manual welding.
- used wherever a non-flammable weld separating spray is required

Application:

Our information are recommendations based on our experience. We accept no liability for any damage without tests concerning suitability for the specific application, without preliminary trials and if the product is misused. Shake can well. Clean workpieces from any possible residues, apply very thinly. This is necessary in order to exclude that pores are formed in the welding material or that hydrogeninduced cracks appear on sensitive steels and critical pressures. Best spraying distance 30 cm. Base: Aqueous emulsion. Do not let active substance get into weld seam. For after treatment of work pieces (painting, hot dip galvanizing etc.), a previous test and cleaning is recommended. Protect from frost! Do not place can within ignition/sparking zones.

Only for professional use! Always observe safety data sheet before use.

Delivery information: Art.-No. 60043

Spray: 400 ml Content, Packing Unit: 12 Cans/Carton

Observe the information on the label and of the EC-safety data sheet!
