OPN-Brake Cleaner 97% active agent

- cleans brake and clutch parts
- degreases and cleans metal

Properties:

- degreases and cleans metal
- reliably removes dirt by tar, lubricants, resins etc.
- also for the preparation of adhesive and sealing surfaces

Application Range:

• for use in automobile shops, industry and trade

Application:

Our information are recommendations based on our experience. We accept no liability for any damage without tests concerning suitability for the specific application, without preliminary trials and if the products is misused. Spray on contaminated parts and let the cleaner run off. Let parts dry air exposed or wipe with a dry cloth. In case of strong contaminations repeat process. If necessary treat persistent foulings with a brush. Only for professional use! Always observe safety data sheet before use.

Please note:

For use on painted and plastic parts test suitability on a covered position. Do not spray on rubber and leather. Do not spray on live wires or parts. When processing larger quantities in small rooms use explosion protection.

Please observe by comparison of prices:

We offer - OPN-Brake Cleaner filled with carbon dioxide = approx. 97% active agent.

Please consider, that conventional fillings with **propane/butane** have <u>only</u> an **active-agent-content of approx. 60%. We use pure, clean active agents** - NO regenerates.
